

Blockchain Group Assignment

- ◆ You can choose one of the following assignment options
- ◆ Option 1: Blockchain Solution Development
 - Basic requirements
 - » Identify a real-world problem which are suitable to be solved by blockchain technology
 - » Write a project proposal slide (motivation, key challenges, objectives, why, how, ...)
 - » Tips: search and read some blockchain project whitepapers/proposals
 - » Develop solution with smart contract features
 - Evaluation criteria
 - » Business innovation – real-world pain points, business impact, business model, incentive model, etc.
 - » Technical innovation – why blockchain? How can blockchain solve the problem? etc.
 - » Quality of the solution
 - » Quality of the presentation
 - Deliverables
 - » Powerpoint presentation deck
 - » 10 mins presentation video
 - » Code
 - » Any other material (if any)

Blockchain Group Assignment

- ◆ Option 2: Options Pricing Model
 - Background: this topic is from our industry partner, Jasper Vault (<https://www.jaspervault.io/>), a decentralized finance (DeFi) startup.
 - Problem statement: Jasper Vault is currently seeking to systematically improve the pricing model for Perpetual Protect (“PP”). The detailed problem statement is uploaded to Canvas
 - Evaluation criteria
 - » Generate long-term, stable, and sustainable positive returns within controlled risk limits, while keeping PP pricing attractive to users.
 - Risk, premium, user willingness to purchase, overall profitability
 - » Quality of the presentation
 - Deliverables
 - » Powerpoint presentation deck
 - » 10 mins presentation video
 - » Code
 - » Any other material (if any)
- ◆ Submission deadline: 11:59pm, 18 Oct, 2026
 - Submit on Canvas; the folder will be close automatically

Form Project Team

- Form the teams (https://nusu-my.sharepoint.com/:x:/g/personal/bizpyj_nus_edu_sg/IQCPySY02hWJQqHkxuXrbLewAYxDbQJ3kqLS4mCUW_6E6aw?e=ywCCB8)
 - ▢ Login with your NUS ID and password for inputting team information
 - ▢ 4~6 people in a team
 - ▢ Recommend to mix of full-time and part-time students
 - ▢ Form the team within two weeks
- Teamwork for the assignments
 - ▢ Ensure that everyone contribute to the solutions
- Ready to present your solution
 - ▢ I will invite several teams to present the solutions in the class
